CAREER OBJECTIVE

A freelance Web Developer seeking to extend my client base, to design new and unique web applications and to update, streamline and improve existing ones. I am dedicated to providing a high quality service that meets and exceeds clients expectations.

PERSONAL STATEMENT

I am a hard-working, passionate and motivated individual who is quick to learn new languages and frameworks. I work well alone and with a team. I have a healthy obsession with programming and design, spanning web app development through to software engineering. I see learning as a never-ending pursuit. I am seeking out companies who want clean, pixel-perfect design and code in front-end web development.

RELATED SKILLS

- Problem-solving, clean programming and creative design.
- Exceptional ability to integrate both creative and logical attributes into all projects and builds.
- I speak HTML, CSS, SASS, Git, Python and JavaScript programming languages.
- 2 years+ Python experience, developing programs and software using both front-end and back-end resources within professionally structured, virtual environments.
- Familiar with ReactJS, mySQL, MongoDB and Pandas databases, Flask, Tkinter, Github and Terminal CLI.
- Quickly able to grasp new languages, API's and other frameworks that are required for the role.
- Exceptional knowledge of creative software packages including Spriter 2D animations, Inkscape vector illustration and Ableton Live, Logic Pro DAW's.
